### Energy Efficiency

Clatskanie PUD's new headquarters was designed and built with energy efficiency and the environment in mind. We felt it was important to lead by example by reducing our environmental impact and optimizing our energy use. As a result of incorporating equipment and materials such as super insulation, low voltage LED exterior lighting, efficient interior fluorescent lighting, automated lighting controls, use of natural daylight, solar water heating and direct slab radiant heat, our facility uses one-third less energy than if built to standard code. We also employ the capture of rainwater through rain gardens and utilize tidal gate technology to filter and control the timing of storm water run-off.

In order to help our customer-owners use energy wisely and efficiently, we offer the following:

- **Free analysis of the energy use in your home, business or investment property**
- **Home Energy User Guide**
- **Loan of "Kill-A-Watt" electricity use monitoring kit**
- **Refrigerator and freezer recycling program**
- **Free compact fluorescent light bulb when you visit our office**
- **Rebate credits toward the cost of qualifying purchases of the following:** attic, wall and floor insulation and windows; select ENERGY STAR manufactured homes; select ENERGY STAR appliances; ductless heat pumps and high-efficiency, ducted heat pumps and duct sealing

If you have questions or would like more information on energy efficiency, please visit our website [www.clatskaniepud.com](http://www.clatskaniepud.com) or call us during regular business hours at (503) 728-2163 and ask for an Energy Services Representative.
