

# We're Visiting Your Neighborhood Soon!

Clatskanie PUD is updating our Geographical Information System (GIS) to better serve our customers. GIS is a digital mapping system that gives us detailed information about our electrical system. In order to update our outdated existing system, we must do a field inventory. We have contracted with Davey Resource Group (DRG), who will be physically visiting and recording information about every pole, transformer and meter in our system. DRG plans to start the first round of visits July 7th and will re-visit a second time to complete the mapping process. DRG professionals will be easily recognizable by their apparel and vehicles and will be carrying a hand-held GPS computer. If you have any questions about this project, please call the PUD at (503) 728-2163.
