

# We're In Your Neighborhood!

Clatskanie PUD is updating our Geographical Information System (GIS) to better serve our customers. GIS is a digital mapping system that gives us detailed information about our electrical system. We have contracted with Davey Resource Group (DRG), who is in the process of conducting a field inventory in order to update our outdated existing system. DRG will be physically visiting and recording information about every pole, transformer and meter in our system. Work is expected to be completed by November. DRG professionals will be easily recognizable by their apparel and vehicles and will be carrying a hand-held GPS computer. If you have any questions about this project, call the PUD at (503)728-2163.
